INDUSTRIAL HANDICRAFTS

From the encounter between industrial craftsmanship and efficient production technologies comes “Storie”, a container that contains the collections Ragno in small size with handmade flavor a real system of furniture solutions available to private individuals and designers.

EVERY COLLECTION IS A STORY

*6 collections united by a shared story of
research, design and technology.*

*6 surfaces with a strong, personal aesthetic
with a rich history, presented in a compact
and versatile format.*

Here are our 6 stories

Ottocento

A vertical strip on the left side of the image featuring a repeating pattern of square tiles. Each tile has a white background with a dark teal geometric or floral design. The patterns include triangles, circles, and stylized flowers.

TRADITION MEETS TECHNOLOGY

While the Storie collections draw strength and inspiration from the aesthetics that have defined the history of ceramic design, the technologies used to create them are an expression of the most advanced production systems, capable of guaranteeing very high performance and technical properties: resistance, easy cleaning, waterproof characteristics, stability and deep colours, whether glossy or matt.

FORGED BY FIRE

The interaction between fire, clay and glass with which the Storie collections are produced makes all the surfaces stand out for their strong shade variation, in other words the variance between the tones of the individual tiles. Light effects, colours and surface structure create a result that conveys the essence of artisan production: unique, exclusive and never the same.

SMALL SURFACES, HIGH IMPACT

Whether matt, glossy or super-glossy, the surfaces in the Storie collections always guarantee extraordinary richness and tactility.
